PrEP1519 is a demonstration cohort study, co-funded by Unitaid and the Brazilian Public Health System, and implemented in three large capital cities: Salvador, Belo Horizonte and São Paulo.

Assesses effective and cost-effective ways to provide HIV PrEP and STI care for adolescent MSM and transgender adolescent girls 15-19 years old.

How can we create demand of PrEP and STI services in this complex context?

Our strategies of recruitment to reach adolescents MSM and TGW create contact; be inclusive:

- Through peer educators (online and offline): LGBTQIA+ parties, mingling areas, bars, venues.
- Recruitment in schools: workshops; sexual education promotions.
- Referrals from NHS-Brazilian SUS services.
- Referrals from NGOs.
- Dating apps: Grindr, Tinder etc.
- By the indication of participants who are in PrEP;
- Amanda Selfie – Transgender chat bot
- Network invitation through Respondent Sampling Driven technique

PrEP1519 Implementation Model: recruiting, enrolling and linking adolescents MSM and TGW to PrEP

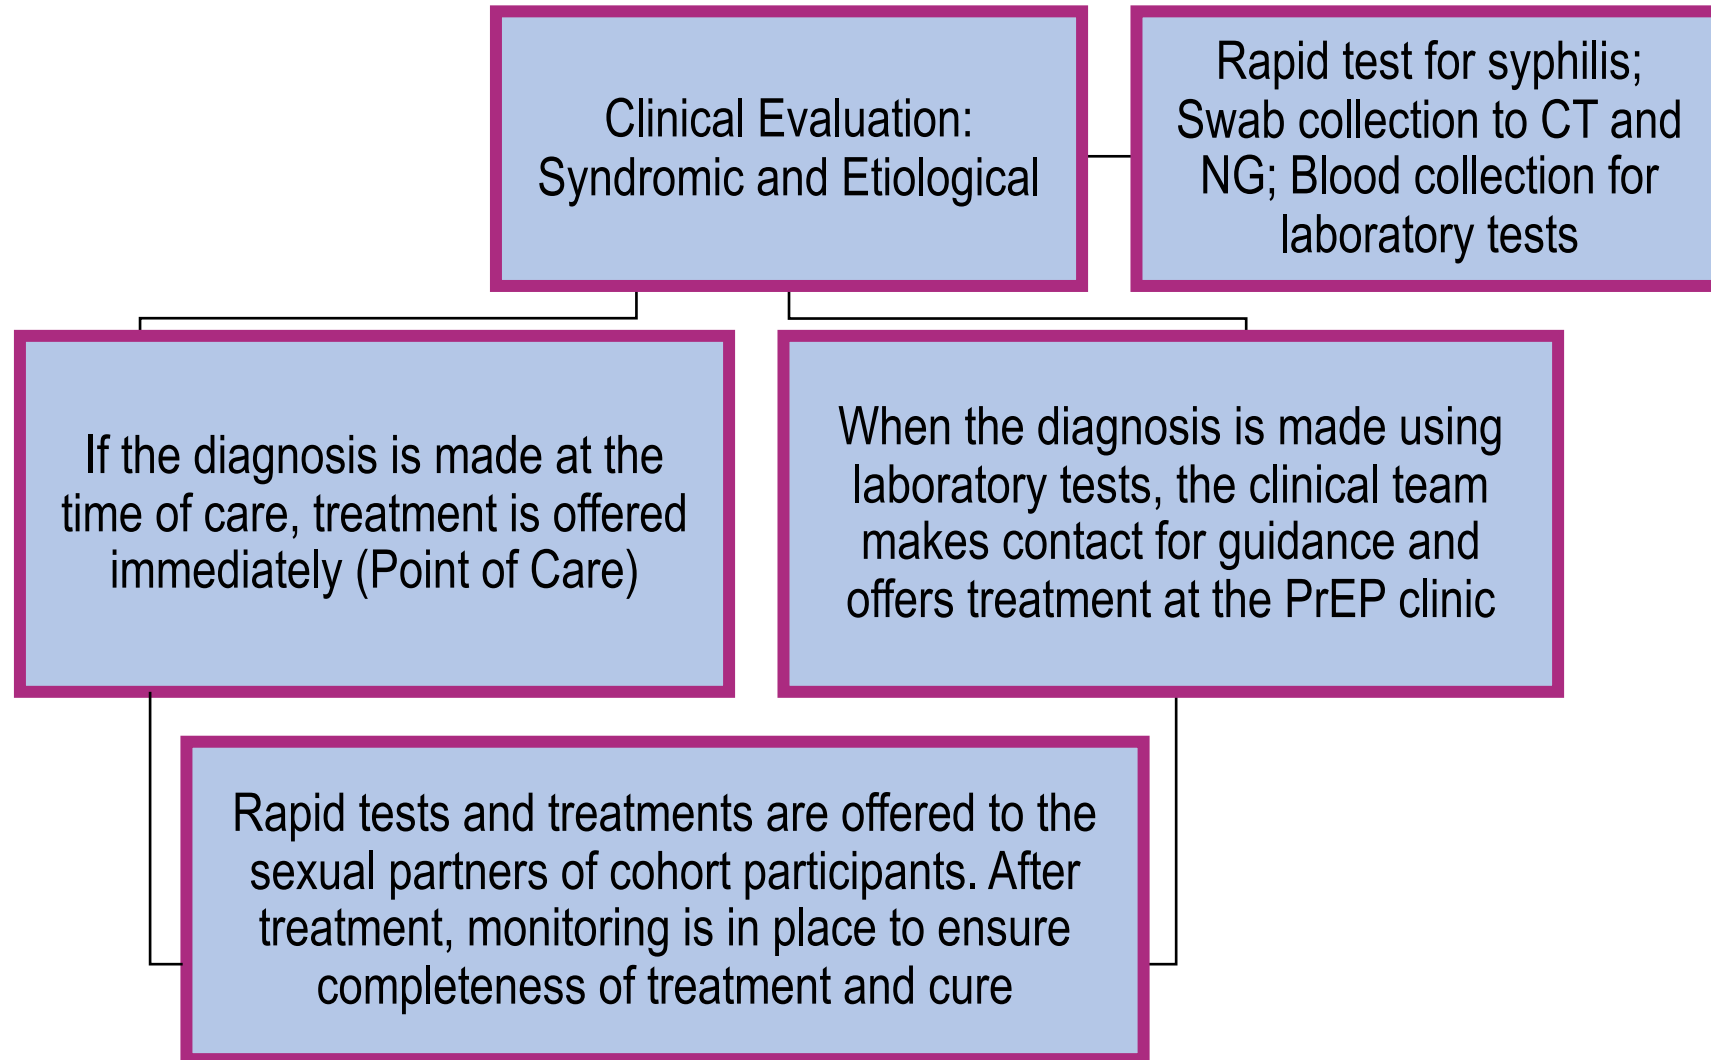

Proportion of MSM and TGW adolescents enrolled in PrEP and other prevention methods by the total population recruited in each demand creation strategy.

PrEP1519, Feb.2019-Feb2021.

Care flow for STI diagnosis and treatment. PrEP1519 clinics, Brazil

STI tests

- Serology for hepatitis A, B, and C.
- Participants with an indication were referred for hepatitis vaccination.
- Rapid tests (RT) for syphilis, and non-treponemal VDRL tests among those who tested positive in the RT.
- Oral, rectal, and urethral swabs or urine samples were used for nucleic acid amplification testing for *Neisseria gonorrhoea* (GC) and *Chlamydia trachomatis* (CT) at baseline, at every 6 months, and as clinically indicated at other intercourse visits.
- The GC and CT prevalence was estimated considering infection in any of the three anatomic sites.

PrEP1519 reached adolescents from KPOPs, how about engaging in PrEP/STI services?

March 2019-December 2022

8,169 AMSM and ATGW were reached by the DCS

18% enrolled in the PrEP cohort,

Need to reach out and create demand for HIV/STI prevention for a large and diverse adolescents MSM and TGW;

Most adolescents recruited by peer educators (PE) activities in online strategies (70.7%);

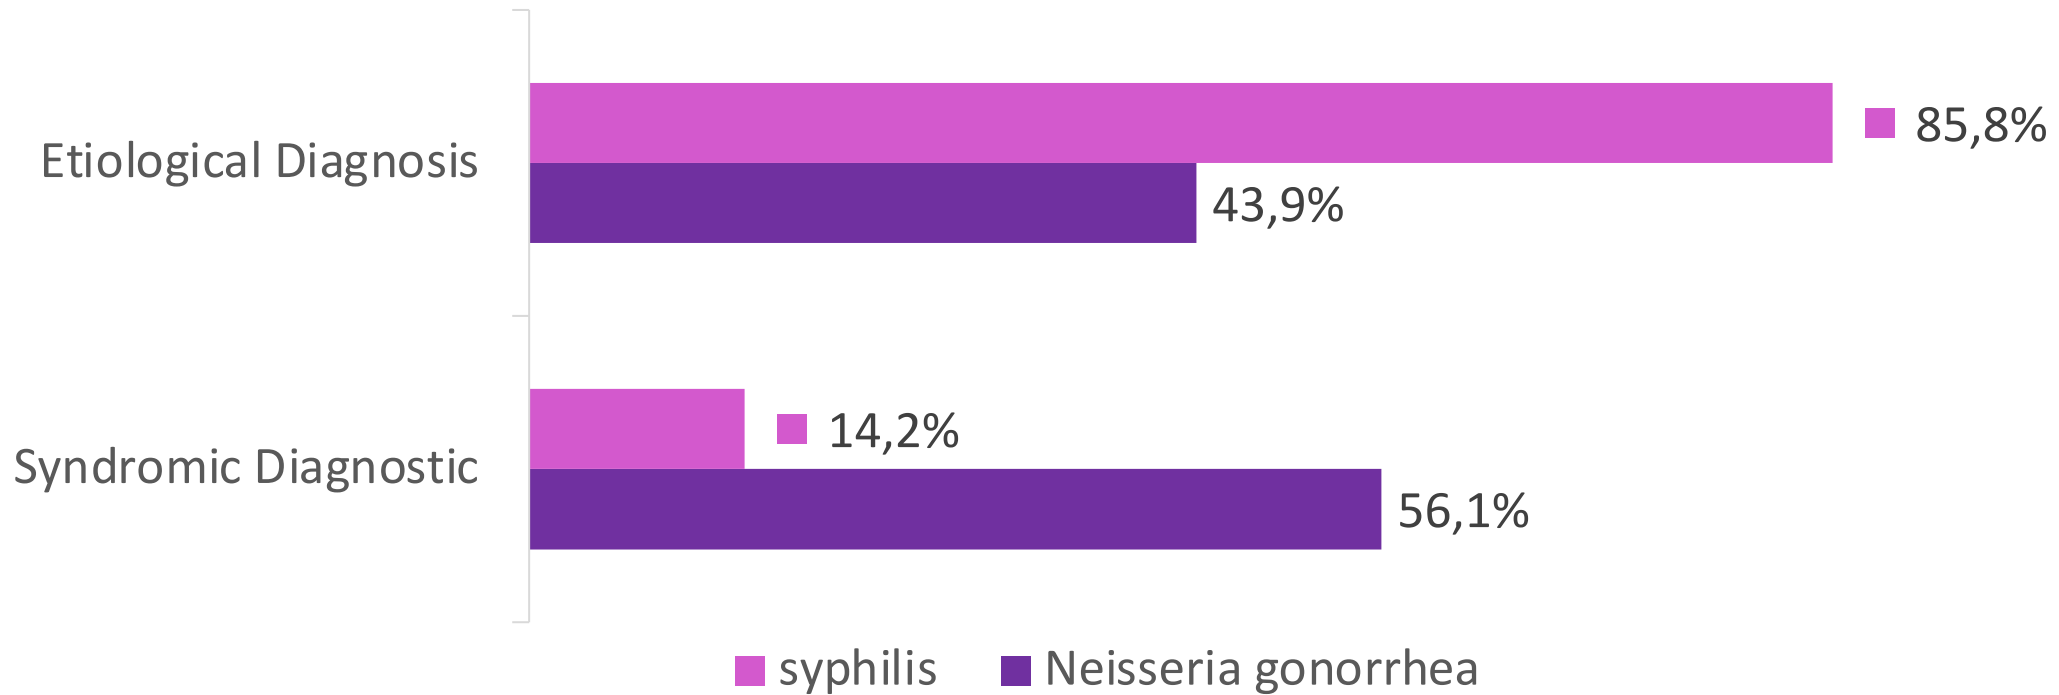

PE in face-to-face contact (16.5%),

then direct referrals from health services and NGO (12.8%);

HIV prevalence at baseline
66/1463= 5%

Baseline Prevalence
Syphilis: 16.2%
GN: 18.4%
CT: 9.4

Proportion of STI diagnosis according to etiological and syndromic approach. PrEP1519 Study, Salvador site, 2019-2022

The importance of access to rapid tests

The PrEP program is an excellent opportunity to treat and care STIs!

STI	<i>N</i>	Incident cases	Sum of PY	Incidence rate per 100 person-years	(95% CI)
<i>N. gonorrhoeae</i>	132	19	219.2	8.7	(5.5-13.6)
<i>C. trachomatis</i>	132	22	246.5	8.9	(5.9-13.6)
<i>M. genitalium</i>	137	11	240.5	4.6	(2.5-8.3)
<i>M. hominis</i>	133	19	224.3	8.5	(5.4-13.3)
<i>U. urealyticum</i>	128	43	186.3	23.1	(17.1-31.1)
<i>U. parvum</i>	137	10	253.9	3.9	(2.1-7.3)

High STI incidence rates

Lessons learned

Pride to be happy

Gay adolescent – peer educator

Pride to be LOVE

Transgender man – navigator care

Pride to be happy

Bisexual nurse

- ❖ Developing comprehensive demand creation strategies, which include social media and digital platforms have the ability to reach young people with information and can provide linkage to services;
- ❖ Understanding young people's values and preferences for service delivery ensures that appropriate service delivery choices are made available.
- ❖ Adolescents, especially the most vulnerable, may need more support to remain in service and PrEP use than adults. Navigators, flexible appointment schedules, financial and emotional support, reminders, and approaches through online social networks are strategies that can help in this regard.
- ❖ Young people needing prevention usually need other services, so providing PrEP as part of a comprehensive package is important. For example, rates of STIs and unmet needs for prevention are high.
- ❖ In addition, young people may require services for gender-based violence and mental health.
